Water Update -Afternoon

February 6, 2023 – Iqaluit, Nunavut

The brief water interruption on Federal Road and the Legislative Assembly has now been resolved.

Iqaluit remains under a precautionary boil water advisory for all customers, for both trucked and piped water services.

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a **minimum** of one full minute.

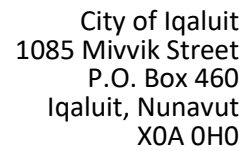

It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

The City of Iqaluit will release a Public Service Announcement when the precautionary boil water advisory is lifted.
