## **Public Service Announcement**

## Water Interruption - Plateau

February 22, 2023 - Iqaluit, Nunavut

There was a brief emergency shutdown of the water system this morning for the Plateau. Service has now been returned. The Plateau is now under a precautionary boil water advisory.

While under a precautionary boil water, please follow these instructions.

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a minimum of one full minute. It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

The City of Iqaluit would like to thank you for your patience during this interruption of water service during this time.
