Water Shut Down and Precautionary Boil Water Advisory

Upper and Lower Plateau

September 18, 2023 – Iqaluit, Nunavut

Please be advised of a localized water shut down on **Tuesday, September 19th**, from 9 am to 5 pm, to allow for necessary water infrastructure work.

Location of water interruption: **Upper and Lower Plateau – 5000's, 5100's, 5200's, 5300's, 504 to 519.**

During the disruption, those locations will see a drop in water pressure. When water pressure drops, the Chief Public Health Officer of Nunavut automatically issues a precautionary boil water advisory. If this water interruption affects your residence, you are under a precautionary boil water advisory.

When the Office of the Chief Public Health Officer informs the City of Iqaluit that the advisory is lifted, we will inform residents.

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a **minimum** of one full minute.

It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.
