

2023-RFT-059	Wastewater/Sewer Line Cleaning and CCTV Assessment
Addendum No 2	07-07-2023

The following changes are effective immediately

The sewer segments identified in the RFT will be priority locations for the Sewer Cleaning and CCTV assessment works. The objective of the project is to conduct an intensive assessment of the Lower Iqaluit and Happy Valley areas. The work consists of:

1. Cleaning up to 4KM (not limited to) of municipal sanitary sewer pipes between manhole sections- of varying size
2. Camera inspection of Sewer manholes and pipes
3. Data and inspection files Compilation- Identify in order of priority, pipe sections and manhole structures that require repair, replacement, or follow up CCTV inspection. And also include a general conditions report.

Please refer to the updated Cost Submission Form (on page 2 of this Addendum)
