## **City reminds public to discharge firearms in designated shooting range**

July 23, 2021 – Iqaluit, Nunavut

There have been concerns brought forth by residents of Iqaluit that there are events of target practice and discharging firearms in the Upper base/Plateau area.

The City of Iqaluit only has one permitted and regulated area assigned as a “Shooting Range”, located near the end to the road to nowhere.

As per the City of Iqaluit Firearms Control Bylaw No. 367:

### 3.1 No person shall discharge any Firearm within the Town of Iqaluit.

3.. The Council may authorize a properly licensed and controlled firing range within the boundaries of town.

The City thanks you for your understanding.
