

Water Shut Down and Precautionary Boil Water Advisory – 103, 104, 105 A-D, 106, 107 A-F, 109 A-F and 273

Please be advised of a water shut down on **Wednesday, September 17, from approximately 9:00AM to 5:00PM** to allow for necessary water infrastructure work.

When water pressure drops, the Chief Public Health Officer of Nunavut automatically issues a precautionary boil water advisory. If this water interruption affects your residence, you are under a precautionary boil water advisory.

The City will issue a second Public Service Announcement once the Office of the Chief Public Health Officer has lifted the Precautionary Boil Water Advisory.

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a **minimum** of one full minute.

It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.
