## Water Shut Down and Precautionary Boil Water Advisory

September 16, 2025 – Iqaluit, Nunavut

---

Please be advised of a water shut down on **September 17, from approximately 1:00 PM to 5:00 PM** to allow for necessary water infrastructure work.

Location of water interruption: **2230 A-B, 2231 A-B, 2232 A-D, 2233 A-D, 2711, 2713, 2715, 2717, 2719, 2721, 2726, 2728, 2730, 2732, 2734 and 2736 A-F.**

When water pressure drops, the Chief Public Health Officer of Nunavut automatically issues a precautionary boil water advisory. If this water interruption affects your residence, you are under a precautionary boil water advisory.

When the Office of the Chief Public Health Officer informs the City of Iqaluit that the advisory is lifted, we will inform residents.

During a precautionary boil water advisory, the City recommends that all water for consumption is brought to a rolling boil for a **minimum** of one full minute.

It is recommended that all water be boiled for the following uses:

- drinking;
- preparing infant formulas;
- preparing juices and ice cubes;
- washing fruits and vegetables;
- cooking; or
- brushing of teeth.

Water can be boiled either in a pot or kettle on a stove or an electric kettle without an automatic shut-off.

The City of Iqaluit will release a Public Service Announcement when the precautionary boil water advisory is lifted.
