

PUBLIC SERVICE ANNOUNCEMENT

TUESDAY TEMPORARY WATER SUSPENSION/BOILED WATER ADVISORY FOR 5000s AREA

MARCH 19, 2018 (IQALUIT, NUNAVUT) – The City is advising residents in the 5000s area of the Plateau that water service will be temporarily suspended on Tuesday, March 20, from 9 AM to approximately 4 PM, to allow for infrastructure repairs on the main water line.

In addition, as a precautionary measure, the City is also advising residents in this area that a boil water advisory will also be in effect during this time, and will remain in place until lifted (normally 24 hours later). Residents are advised to use boiled water – or bottled water – for drinking, brushing teeth, preparing infant formula, food preparation, making ice, as well as for such activities as washing dishes.

To use boiled water, residents are asked to bring tap water to a boil for two minutes, then use when cool.

The City would like to thank residents for their understanding.
